BioMedix™ Announces PADnet™ DMS 2.0 Advanced Vascular Program Solution for Specialists

Saint Paul, MN – June 15, 2011 – BioMedix™, a leader in providing integrated medical diagnostic hardware, Health Information Technology (HIT) software and web-based solutions, announces PADnet™ Disease Management System 2.0 (PADnet™ DMS 2.0) for Specialists. This web-based vascular program solution is the cornerstone of referral and financial data analysis for diagnostic and interventional suites. PADnet™ DMS 2.0 for Specialists features advanced reporting capabilities and a web-based interface that allows practice administrators to access and analyze network activity, accurately track referral patterns and easily view and print reports.

Networking Specialists and Primary Care Physicians via the PADnet™ DMS 2.0 platform creates a comprehensive collaborative care model, leading to better care and business performance. This approach helps those clinicians specializing in minimally-invasive, non-surgical treatment of vascular disease to build their practices via community outreach programs.

“This integrated outreach and tracking solution for Specialists represents another example of our commitment to providing the best tools to support the early detection and management of vascular disease,” stated BioMedix™ CEO John Romans. “PADnet™ DMS 2.0 for Specialists is another step towards truly seamless and cost-effective patient care.”

Customizable to each practice or lab, the PADnet™ DMS 2.0 solution for Specialists offers key benefits for the practice: searchable financial analysis for any given period, real-time program tracking and complete transparency for quantifiable program results. Practice administrators can track referral patterns and evaluate the success of the program in real time using the PADnet™ DMS 2.0 Network Reporting Dashboard. Advanced graphing and reporting options, such as abnormality rate and patient history analysis facilitate evidence-based decision-making.

About BioMedix™

BioMedix™ is a leader in Health Information Technology (HIT) software, products and services that connect Podiatric Physicians, Primary Care Physicians, vascular labs, vascular specialists and healthcare systems in a continuum of collaborative care. We provide the only integrated suite of hardware, software and online services designed to cost-effectively detect vascular disease. Our award-winning suite of medical devices, advanced practice management and Electronic Health Record (EHR) software and web-based solutions give providers a more complete view of patient care. For more information about BioMedix™ products, call 877-854-0014 or log on to www.BioMedix.com.
