Press Release

BioMedix Receives Clinical Approval for TRAKnet Software

04.27.10, 06:44 PM EDT

ST. PAUL, Minn., April 27

/PRNewswire/ -- Today, the

BioMedix TRAKnet software suite

was granted the prestigious **American Podiatric Medical Association** (APMA) Seal of Acceptance. BioMedix is the only company to receive the APMA Seal of Acceptance for Electronic Health Record and Practice Management software.

"TRAKnet is an invaluable tool for our member podiatrists because it integrates day to day activities such as electronic health records, charting, scheduling and billing into one comprehensive system," said APMA President Kathleen Stone, DPM. "The system also helps our members take advantage of federal incentives offered to physicians using electronic medical records."

TRAKnet Electronic Health Record and Practice Management software is an expandable, all-in-one practice management platform that enables seamless operation and increased efficiency while reducing costs. Designed by and for podiatric physicians, the software incorporates billing, charting, scheduling, e-prescribing and

[inventory management](#) to allow effortless transition from scheduling to encounters and claims while interfacing with the BioMedix full suite of software and hardware products that enable physician offices, vascular labs and hospitals to deliver community based collaborative care.

Established more than 35 years ago, the **American Podiatric Medical Association** (APMA) Seal Program was created to inform both podiatric physicians and consumers about products whose quality, safety, and effectiveness allow for normal foot function and/or promote quality foot health. The APMA Seal of Acceptance is awarded to equipment for professional use in the delivery of foot care when evidence of safety and effectiveness has been established by an appropriately recognized laboratory

and/or clinical investigation and/or when physical standards and/or specifications applicable to equipment have been met.

John Romans, BioMedix President and CEO comments, "It is always a great honor to receive clinical approval from a national physician association. Receiving the APMA's Seal of Acceptance for TRAKnet, however, is particularly special as we are committed at BioMedix to making healthcare [information technology](#) more accessible to the podiatric physician community so they may better serve patients in critical need of their care."

About BioMedix

BioMedix Vascular

Solutions, Inc. provides the only integrated suite of hardware, software and online services designed to cost-effectively detect Peripheral Arterial Disease (P.A.D.) and Chronic Venous Insufficiency (CVI).

Vascular specialists, primary care providers, hospitals and health systems use our products to identify these patients. Our devices and Health Information Technology (HIT) software reduce mistakes, provide data for sound analysis, build practice revenue and streamline reimbursement while providing a platform that supports the continuum of care and increased quality outcomes. For more information, call 877-854-0014 or log on to www.BioMedix.com.

*About the **American Podiatric Medical Association***

Founded in 1912, the **American Podiatric Medical Association** (APMA), headquartered in [Bethesda](#), Maryland, is the leading resource for foot and ankle health information. Currently, the organization represents a vast majority of the estimated 15,000 podiatrists in the country. In addition to the national headquarters, APMA boasts 53 state component locations throughout the United States and its territories, as well as affiliated societies. For free foot health information, contact APMA at 1-800-FOOTCARE (1-800-366-8227) or visit www.apma.org on the web.
