

**ICS Software and Collaborative Care Diagnostics Announce**

**Sammy / PADnet Bidirectional Interface**

*Showcased at the APMA Annual Scientific Meeting*

**Orlando, FL — July 23, 2015** — ICS Software and Collaborative Care Diagnostics announced the immediate availability of a bi-directional interface between Sammy System EMRs and PADnet® during a Vascular Roundtable Reception, following ACFAOM’s Annual Clinical Conference, proceeding APMA’s 2015 Annual Scientific Meeting (The National), at the Orlando World Center Marriott.

“The ability to seamlessly import patient data and schedules from Sammy into PADnet as well as export test results from PADnet into Sammy is an exciting development for the Podiatric physician community. This will minimize redundant data entry and streamline workflows within Podiatry practices, enabling providers to spend more time with patients at-risk for Peripheral Artery Disease (PAD) and/or Chronic Venous Insufficiency (CVI),” said Graham Heaven, Vice President of Collaborative Care Diagnostics.

“The commitment to continuous product enhancement was one of the key reasons we partnered with Collaborative Care Diagnostics as the exclusive PADnet distributor for Podiatric physicians,” said Kevin Ostwald, SureFit Director of Sales. “This bi-directional interface with Sammy is a great example of two strong organizations working to improve workflow and practice management in the physician office.”

ICS Software, Collaborative Care Diagnostics, and SureFit are leaders in supporting the Podiatric community with the latest advancements in Healthcare IT. Learn more about this immediately available interface at the ICS Software or SureFit booths at the APMA National meeting taking place in Orlando, FL July 23<sup>rd</sup>-26<sup>th</sup>, 2015.
